Executive Summary

This deliverable tries to show which is the current situation of the trans-national access activity after the end of the third access campaign (M41). Firstly, a summary of the transnational access offered per facility is presented, according to the data of the Grant Agreement (Amendment Reference No AMD-823802-15), in order to get an idea of the commitment of the beneficiaries of the SFERA-III Project in this activity, which represents approximately 1/3 of the total budget of the Project. Then, the data corresponding to the user-projects received requesting access to our installations during the second and third calls are presented, detailing the type of organizations requesting this access and the countries of origin of these. Finally, the data corresponding to the accesses finally provided by the installations to the users whose proposals were approved by the User Selection Panel are offered.

In short, what follows are intermediate statistics on access provided by all partners installations.
